

Anabec Systems

Application Notes: anaFRESH

WAYS TO APPLY

- ✓ Fogger (thermal fogger cannot be used)
- ✓ Pump Sprayer
- ✓ Airless Sprayer (tip size 0.011)
- ✓ Spray Bottle / Rag
- ✓ Mop / Bucket

PACKAGING

- ✓ Available for sale in Quarts (32 oz)
- ✓ Concentrate, 2-8 ounces makes 1 gallons
- ✓ Approximate Cost per ready to use gallon \$ 2.00

PRECAUTIONS

- ✓ The anaFRESH concentrate may cause temporary eye irritation
- ✓ Packaged and intended for commercial use
- ✓ Completely review the SDS and Product Label prior to use

Typical Uses

- ✓ Contact deodorizer
- ✓ Suitable for any surface that can be wetted
- ✓ Fire / Smoke deodorization
- ✓ Tobacco deodorization
- ✓ Water / flood restoration
- ✓ Sewer backflow cleanup
- ✓ Laundry & textiles

How it works

- ✓ anaFRESH is composed of a mixture of essential oils that directly interact with the foul odor molecules present in the material being treated.
- ✓ The concentration of the product must meet or exceed the concentration of the odor molecule to be fully effective. If the odor persists after treatment a second application is necessary.
- ✓ anaFRESH must come in contact with the offensive odor source to be effective.

Application Notes

- ✓ Mix 2-8 ounces of anaFRESH with 1 gallon of clean water or add to a cleaning detergent,
- ✓ Do NOT mix with bleach based cleaners, this will significantly diminish the effectiveness of the product.
- ✓ Recommended solution concentrations:
 - Fire Damaged Surfaces: 8 oz per gallon
 - Smoke Residue on surfaces: 4 oz per gallon
 - Water / Flood restoration: 2-4 oz per gallon
 - Sewer Backflow: 2-4 oz per gallon
- ✓ The solution will remain viable for an indefinite period of time.
- ✓ In order to achieve the best results Anabec recommends pre-cleaning heavily soiled surfaces with an appropriate cleaning agent.
- ✓ The anaFRESH solution should be left on the surface to dry.
- ✓ If the odor of the anaFRESH persists after application, the concentration of the solution was too high. Rinse the surface / material with clean water if the scent is undesirable.
- ✓ Clean up equipment with clean water.
